Objective

I am looking for a place where I can maximize my management skills, quality self-confidence, program development, and training experience. Also, obtaining a position that will give me the ability to use my strong organizational skills, educational background, and my ability to work well with others. At UCSD I have learned several programming languages, and some I learned outside of classes. I am focused and willing to learn how I can apply my new skills into the real world outside of school.

Experience

Reality Changers   **01/2009-05/2011**

Tutor: Volunteer

· I helped high school students get better grades and achieve to become first generation future college students.
